Condition of the Month

Motor vehicle accident rehab

Immediately following a motor vehicle accident, most people feel stiffness in their muscles and joints, but discomfort is not always present. Unfortunately, stiffness is often a sign of imminent pain that will require treatment. Whether you visit us right after your accident or wait until the painful reminders are more prominent, we will be able to assist you. We can treat a wide range of injuries resulting from your accident,

including:

- Whiplash Associated Disorder (WAD) – This may lead to severe headaches and muscle spasms
- Concussions
- Lower back pain
- Fractures
- Muscle tears
- Cognitive impairment
- Ligament strains and sprains

Our team of MVA rehabilitation experts will help you restore function and reduce pain following an automobile accident. By identifying all your injuries and carefully creating a plan to address them, we will get you back to your regular routine quickly.

Do not hesitate to seek assistance or begin an MVA rehabilitation program. Quick action helps increase your chances of a full recovery. Remember it is your choice where you attend for post MVA rehabilitation even if your insurance company offers a preferred provider.

Unsure where to start?? Call us on 780-438-4515, our team will be more than happy to answer your questions.
